How to Combine on-going Open Source Efforts and Initiatives for building effective and market-oriented Ami/AAL solutions

---

Antonio Kung

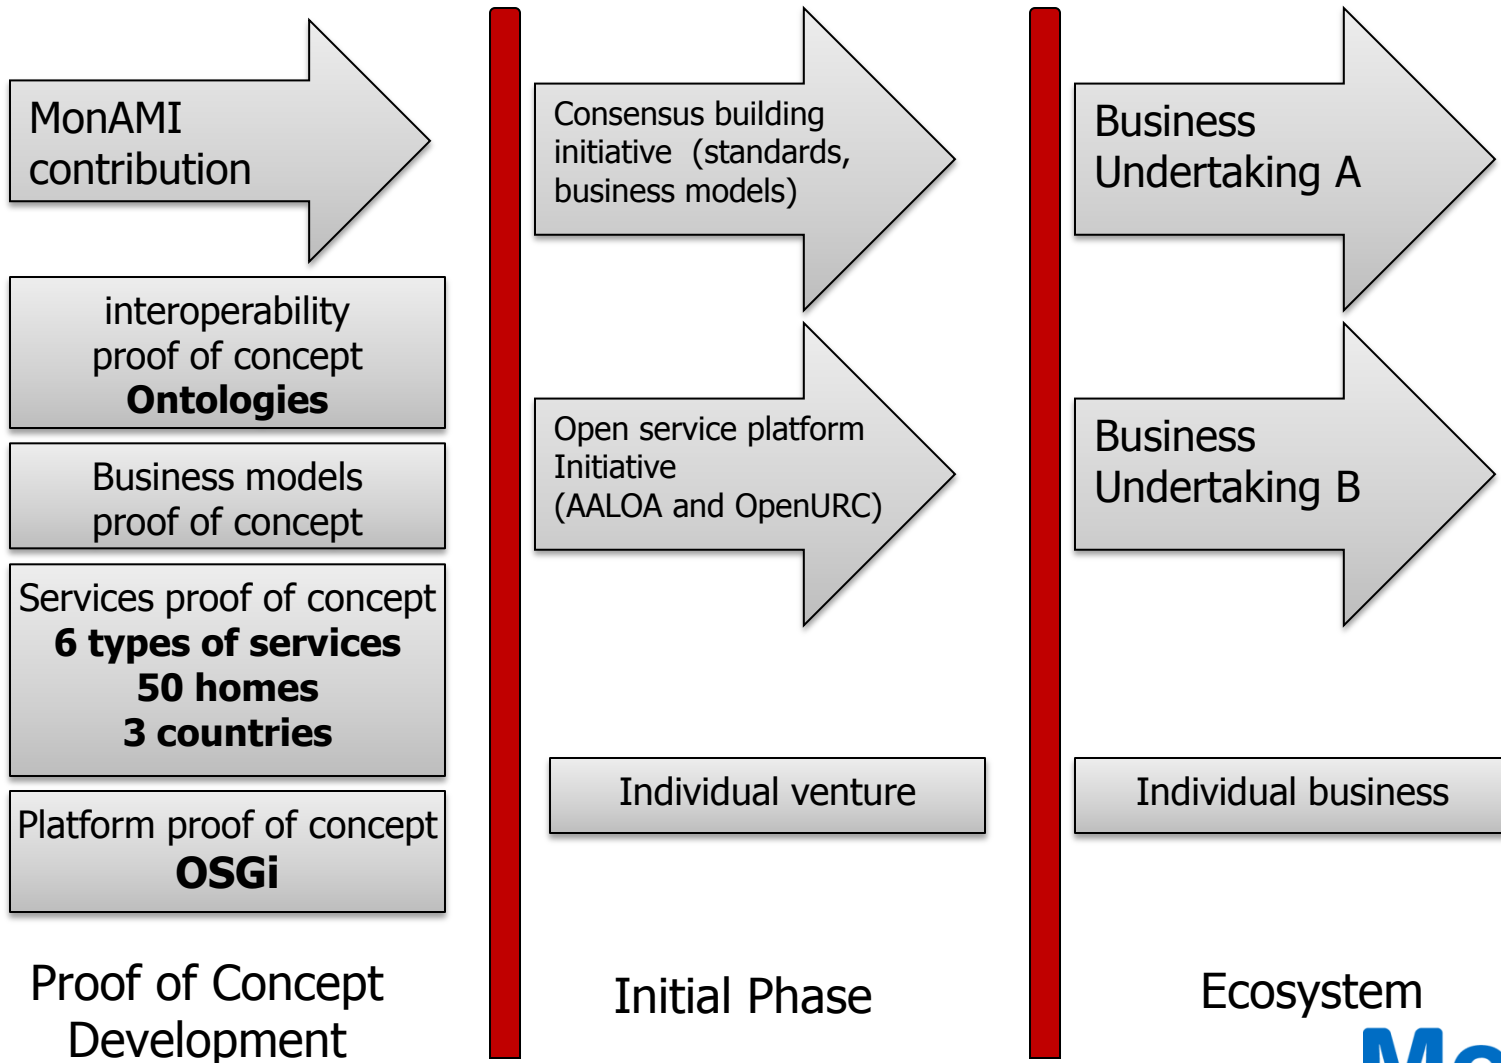

# MonAMI Viewpoint on AAL Market

---

- Advent of ecosystems depends on
  - (1) widely available technology,
  - (2) associated standards,
  - (3) compatible business models
- Kick start AAL ecosystem as follows
  - Focus on one interface: The **service-platform interface**
  - Address (1) through an initiative for open service platform
  - Address (2) and (3) through a consensus building forum

# Roadmap as Viewed by MonAMI

# Towards Widely Accepted Platforms

---

- How to get accepted by developers
  - Platform ecosystem must allow for innovation/research contribution
  - Platform ecosystem must allow for industry contribution
  - Two coordinated activities
    - Federation of projects (e.g. open source initiative)
    - Extracting industry platform (e.g. open source initiative)
- How to get accepted by market and deciders
  - Application ecosystem must allow for interoperability
  - Application ecosystem must allow for competing platforms
  - Two coordinated activities
    - Definition of independent interoperability standards (e.g. consensus building initiative)
    - Adaptation/evolution of platform to conform to these standards (e.g. open source initiative)

# Making AAL a Reality: MonAMI Conference Series

---

- **Platforms for AAL Applications**  
in conjunction with EuroSCC (5th European Conference on Smart Sensing and Context)  
November 16th 2010, Passau, Germany.
- **AAL Services: the Case of Spain**  
February 2011, Zaragoza, Spain.
- **Business Models for AAL in Europe**  
March 28-29, 2011, London School of Economics.
- **AAL Services in Middle and Eastern Europe**  
April 12-15, 2011, High Tatras, Slovakia.
- **Policy Framework for AAL**  
**AAL Services: the Case of Sweden**  
May 19-20, 2011, Stockholm
